DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-5, drawn to a method of detecting a target protein in a sample, classified in class 436, subclass 518.
 - II. Claims 6-14, drawn to a method for identifying a protein that is differentially displayed between two complex biologic samples, classified in class 435, subclass 7.93.
 - III. Claims 15-26, drawn to a method for analyzing a protein analyte present as a plurality of cleavage products in admixture with cleavage products of other proteins, classified in class 435, subclass 68.1.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, II and III are unrelated methods. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions has different modes of operation. Invention I is drawn to a method for detecting a target protein in a sample comprising capturing the target protein on an affinity capture probe. Invention II is drawn to a method for identifying a protein that is differentially displayed between two complex biologic samples comprising using mass spectrometry. Invention III is drawn to a

method for analyzing a protein analyte present as a cleavage products in admixture with cleavage products of other proteins.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper. Please note that classifications in the restriction are illustrative only and do not represent all the classes and subclasses which must be searched for each invention; nor is the search limited to issued US patents, but rather includes foreign patents and applications as well as literature searches, therefore restriction for examination purposes as indicated proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
